

1.Login with valid username & password

This report contains manual test cases executed for the OrangeHRM Login Page. The purpose of testing is to ensure that the authentication functionality works correctly under valid, invalid, and boundary conditions.

The testing includes:

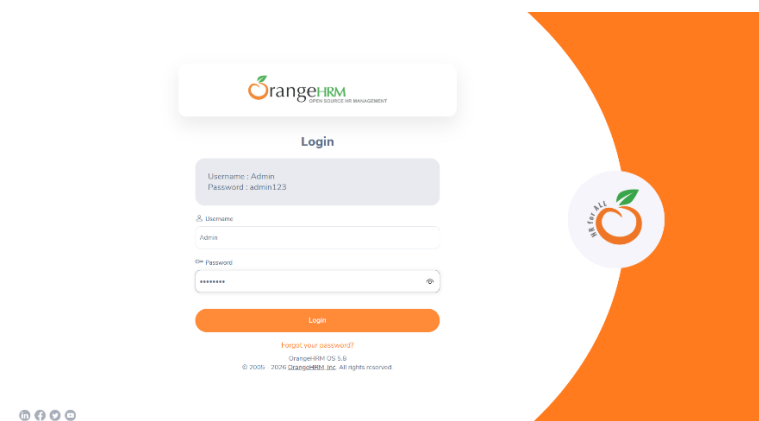

- Functional Testing
- Validation Testing
- UI Testing
- Security Testing
- Usability Testing

Application Details

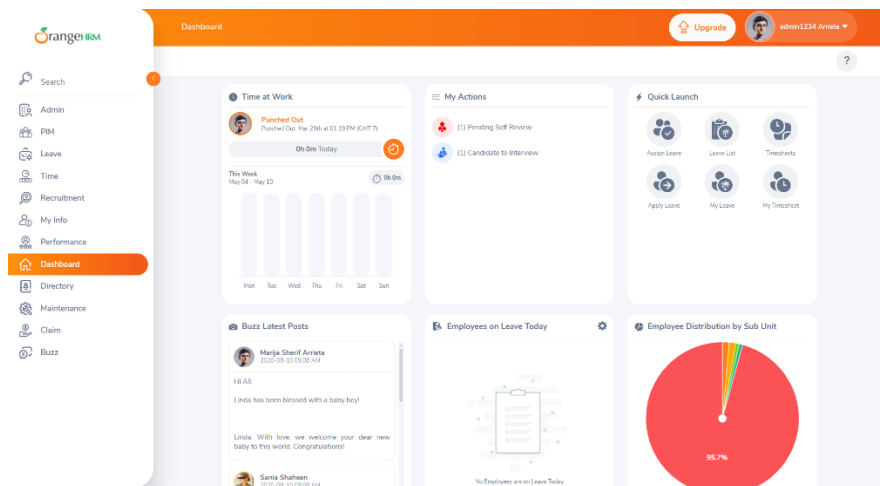

- Application Name: [OrangeHRM Demo](#)
- Module: Login Page
- Testing Type: Manual Testing
- Environment: Web Browser
- Objective: Verify login functionality using valid, invalid, and edge-case scenarios.

2.Test Case – Login with Invalid Password

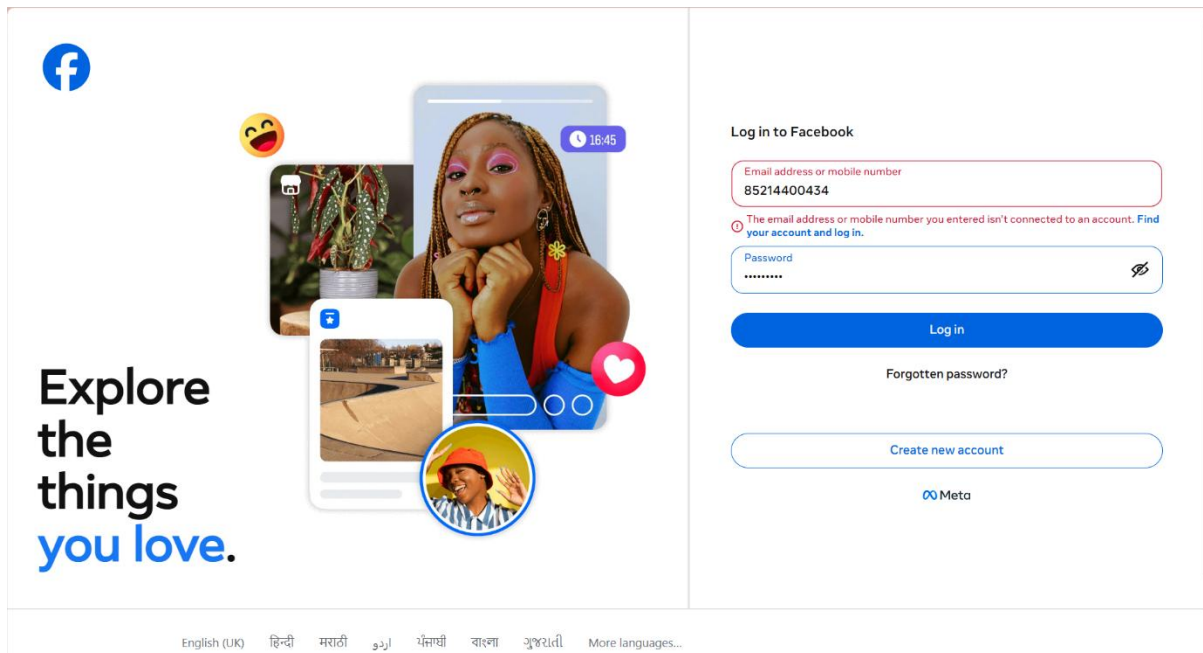

Module	Login Page
Test Scenario	Verify login functionality with invalid password
Test Steps	1. Enter valid username 2. Enter incorrect password 3. Click on Login button

Test Data	Username: 8521440075 Password: *****edf
Expected Result	System should display an “Invalid credentials” error message and prevent user login
Actual Result	Application displayed “Invalid credentials” message successfully and denied access
Status	 Pass
Priority	High

3.Test Case: Login with Invalid Username

Field	Details
Test Case ID	TC_LOGIN_002
Test Case Title	Verify login with invalid username and valid password
Module	Authentication / Login
Pre-Condition	User is on the Facebook login page
Test Scenario	Check system behavior when an invalid username is entered with a valid password
Test Steps	1. Open the login page 2. Enter an invalid username/mobile number 3. Enter a valid password 4. Click on the Log in button
Test Data	Invalid Username: 85214400434 Valid Password: *****
Expected Result	System should not allow login and an appropriate error message should be displayed: <i>“The email address or mobile number you entered isn't connected to an account.”</i>

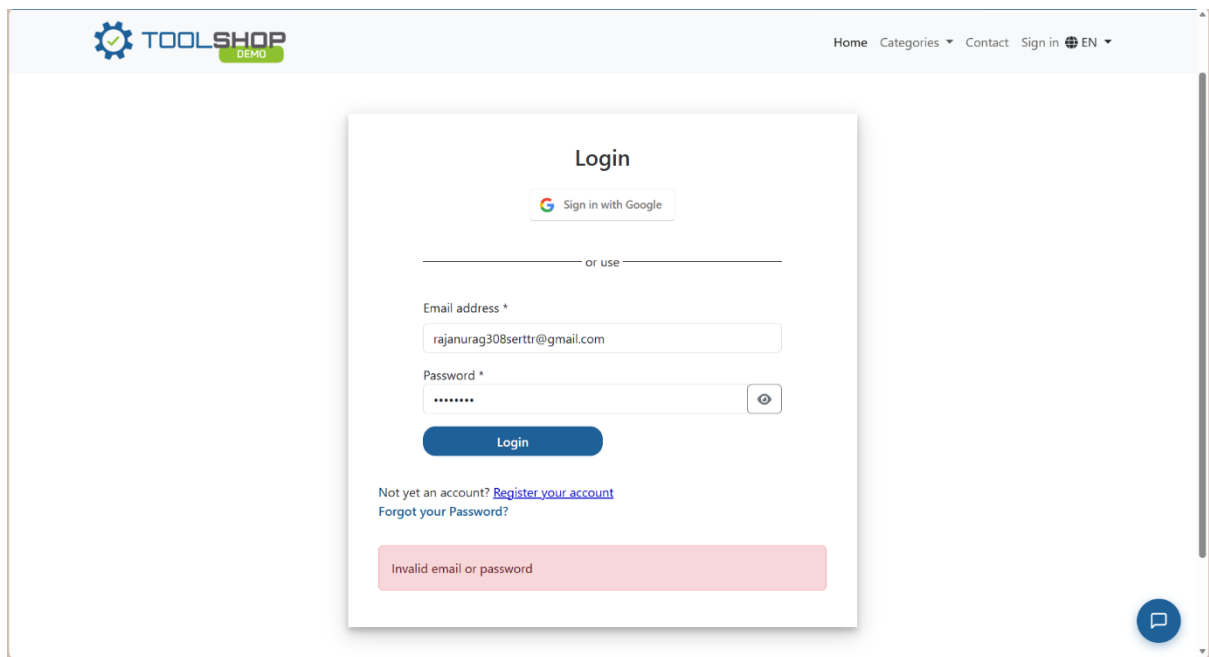

Field	Details
Actual Result	Error message displayed and login failed successfully
Status	Pass

4.Test Case – Login with Both Invalid Credentials

Field	Details
Test Case ID	TC_03
Module	Login Page
Test Scenario	Verify login functionality with invalid username and invalid password
Test Steps	1. Enter incorrect email/username 2. Enter incorrect password 3. Click on the Login button
Test Data	Username: rajanurag308sertttr@gmail.com Password: wrongpassword123

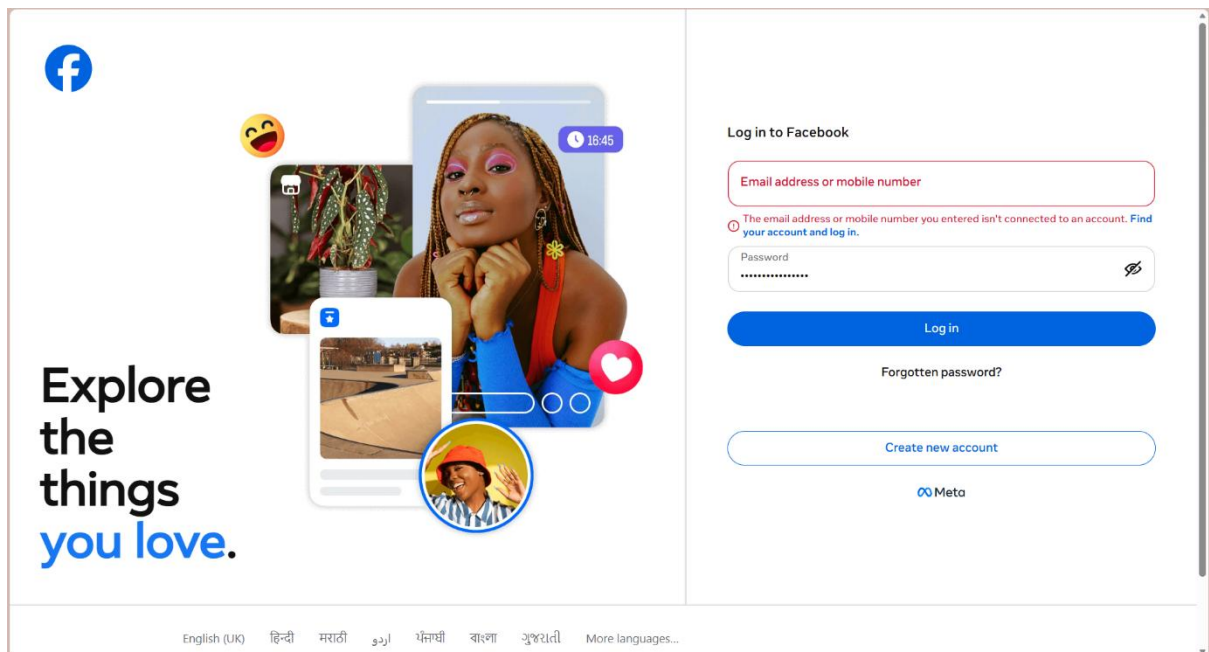

Field	Details
Expected Result	System should reject the login attempt and display an appropriate error message
Actual Result	Application displayed “Invalid email or password” message and denied login access
Status	✓ Pass
Priority	High

5.Test Case: Login with Empty Username Field

Field	Details
Test Case ID	TC_LOGIN_003
Test Case Title	Verify login with empty username field and valid password
Module	Authentication / Login
Pre-Condition	User is on the Facebook login page
Test Scenario	Check system validation when the username/email field is left blank

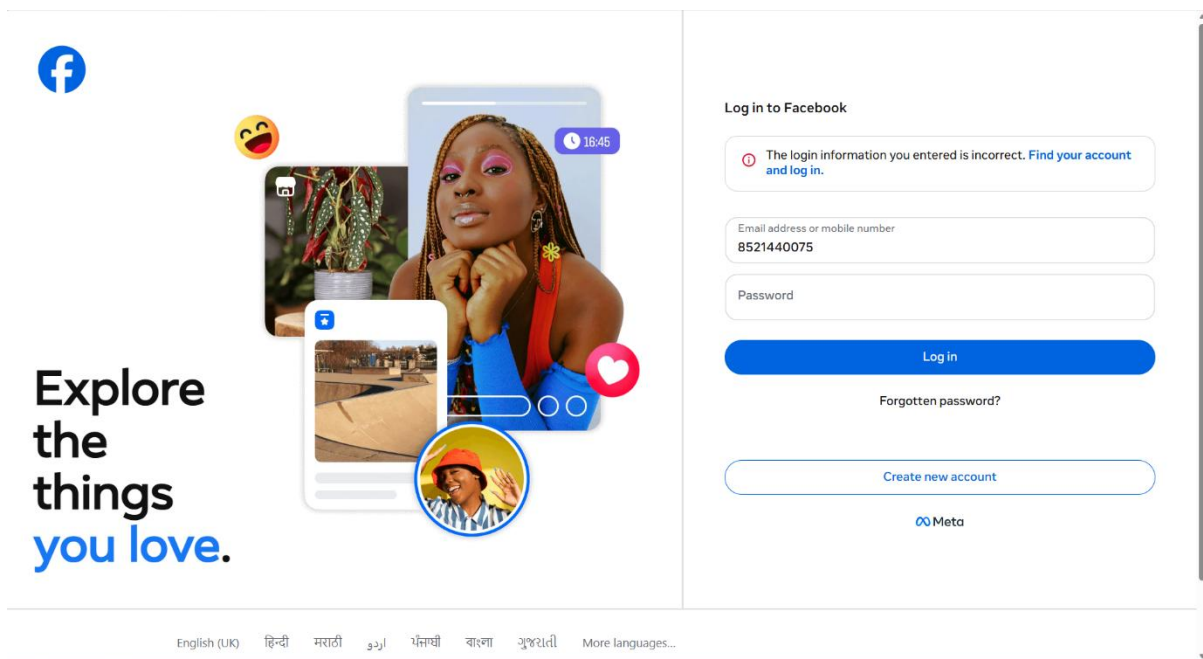

Field	Details
Test Steps	1. Open the login page 2. Leave the username/email field empty 3. Enter a valid password 4. Click on the Log in button
Test Data	Username: <i>Blank</i> Password: <i>*****</i>
Expected Result	System should not allow login and a validation/error message should be displayed for the empty username field
Actual Result	Validation message displayed and login attempt was blocked
Status	Pass

6.Test Case: Login with Empty Password Field

Test Case Title	Verify login with valid username and empty password field
Module	Authentication / Login

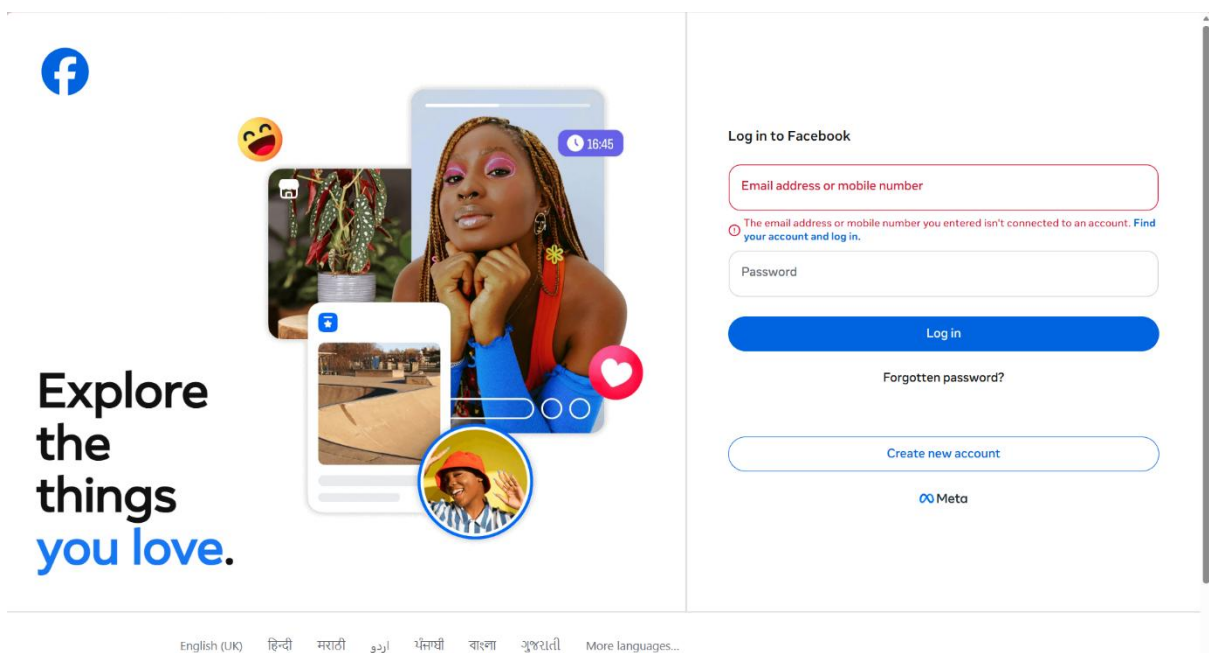

Pre-Condition	User is on the Facebook login page
Test Scenario	Check system validation when the password field is left blank
Test Steps	1. Open the login page 2. Enter a valid username/email/mobile number 3. Leave the password field empty 4. Click on the Log in button
Test Data	Username: 8521440075 Password: <i>Blank</i>
Expected Result	System should not allow login and a validation/error message should be displayed for the empty password field
Actual Result	Login failed and validation message displayed successfully
Status	Pass

7.Test Case: Login with Both Fields Empty

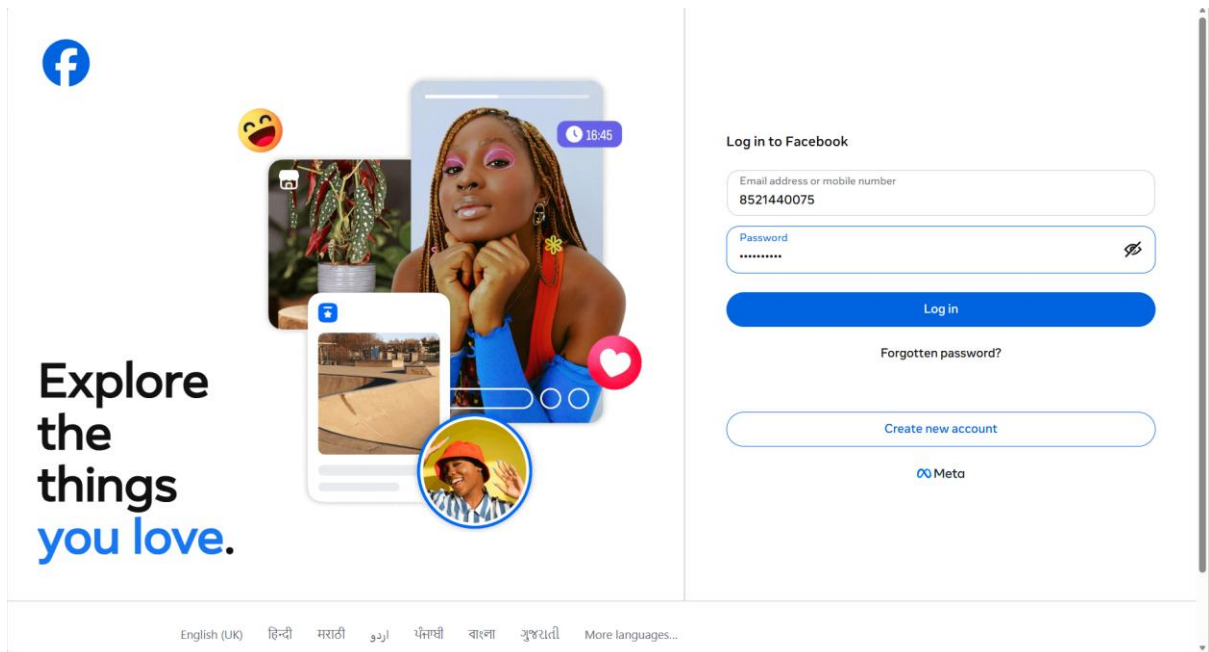

Field	Details
Test Case ID	TC_LOGIN_005

Field	Details
Test Case Title	Verify login functionality when both username and password fields are empty
Module	Authentication / Login
Pre-Condition	User is on the Facebook login page
Test Scenario	Check system validation when no login credentials are entered
Test Steps	1. Open the login page 2. Leave the username/email field empty 3. Leave the password field empty 4. Click on the Log in button
Test Data	Username: <i>Blank</i> Password: <i>Blank</i>
Expected Result	System should not allow login and validation/error messages should be displayed for both required fields
Actual Result	Login attempt failed and appropriate validation messages were displayed
Status	Pass

8.Test Case: Password Masking Verification

Field	Details
Test Case ID	TC_LOGIN_006
Test Case Title	Verify password masking functionality in password field
Module	Authentication / Login
Pre-Condition	User is on the Facebook login page
Test Scenario	Check whether entered password characters are hidden for security purposes
Test Steps	1. Open the login page 2. Enter a valid username/email/mobile number 3. Type password in the password field
Test Data	Username: 8521440075 Password: *****
Expected Result	Password characters should be hidden/masked and displayed as dots or asterisks
Actual Result	Password entered was successfully masked in the password field
Status	Pass

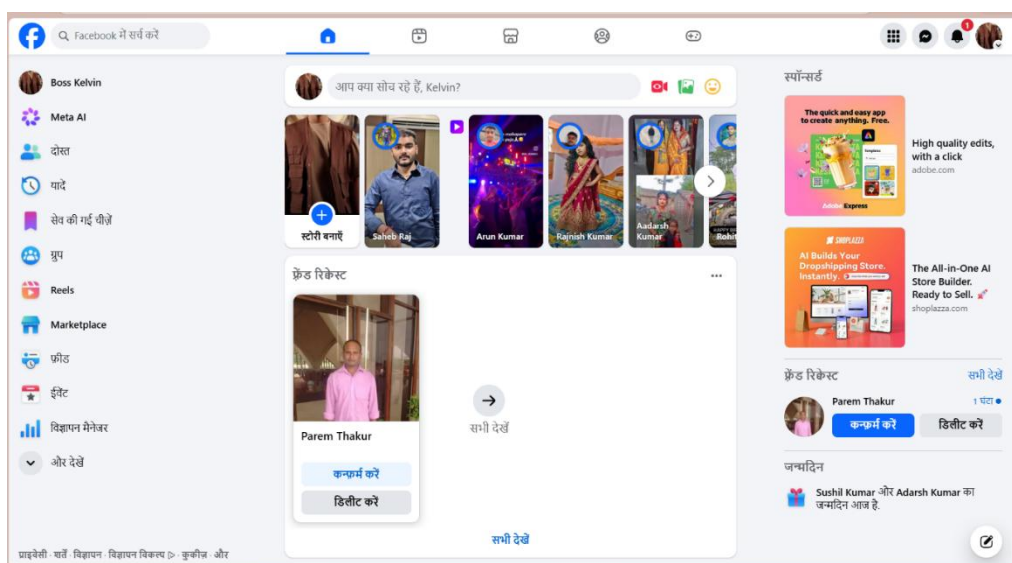

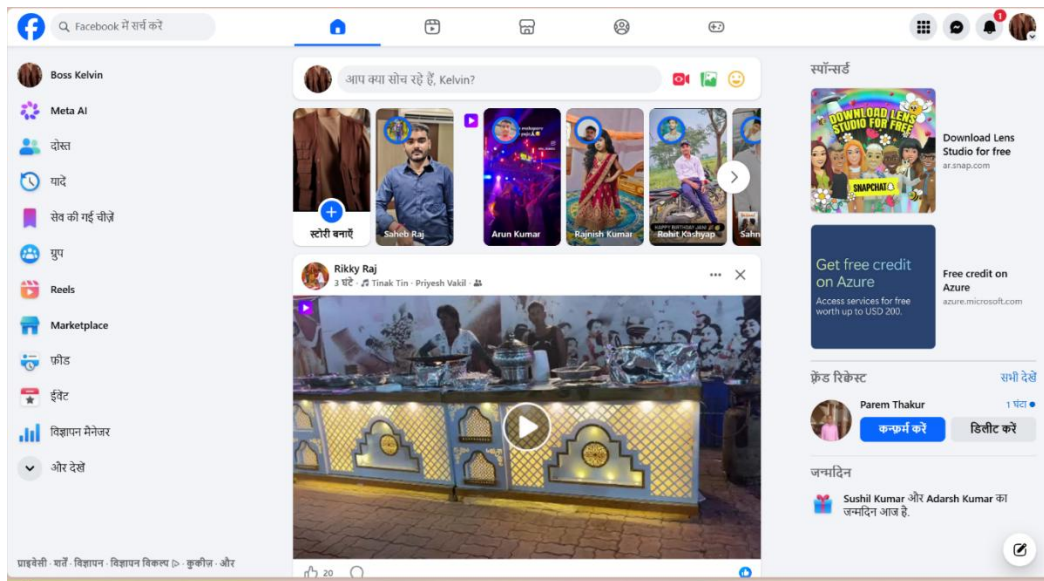

9.Test Case: Forgot Password Link Verification

Field	Details
Test Case ID	TC_LOGIN_007
Test Case Title	Verify navigation through “Forgot Password” link
Module	Authentication / Password Recovery
Pre-Condition	User is on the Facebook login page
Test Scenario	Check whether the user is redirected to the password recovery page after clicking the “Forgot Password” link
Test Steps	1. Open the login page 2. Click on the Forgotten password? link
Test Data	N/A
Expected Result	User should be redirected to the Find Your Account / Password Reset page
Actual Result	User successfully navigated to the password recovery page
Status	Pass

10.Test Case: Remember Me Checkbox Functionality

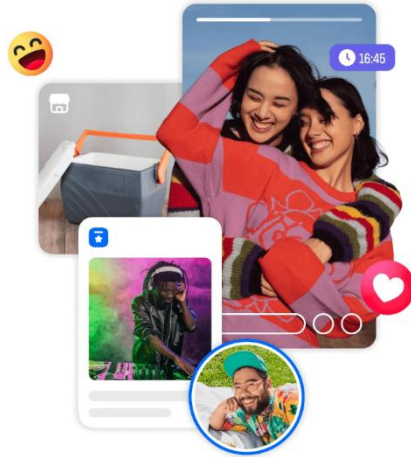

Field	Details
Test Case Title	Verify “Remember Me” functionality after successful login
Module	Authentication / Session Management
Pre-Condition	User has a valid registered account and is on the login page
Test Scenario	Check whether the user session remains active after selecting the “Remember Me” option and reopening the browser
Test Steps	1. Open the login page 2. Enter valid username and password 3. Select the Remember Me checkbox (if available) 4. Click on the Log in button 5. Close the browser 6. Reopen the browser and access Facebook again
Test Data	Valid Username: 8521440075 Valid Password: *****
Expected Result	User session should remain active and the user should not be required to log in again after reopening the browser
Actual Result	User session remained active after reopening the browser
Status	Pass

11.Test Case: Login Using Enter Key

Field	Details
Test Case ID	TC_LOGIN_009
Test Case Title	Verify login functionality using the Enter key
Module	Authentication / Login
Pre-Condition	User has a valid registered account and is on the login page
Test Scenario	Check whether pressing the Enter key submits login credentials successfully
Test Steps	1. Open the login page 2. Enter valid username/email/mobile number 3. Enter valid password 4. Press the Enter key from the keyboard
Test Data	Username: 8521440075 Password: *****
Expected Result	User should be logged in successfully after pressing the Enter key
Actual Result	Login was successful and user was redirected to the home page
Status	Pass

12.Test Case Name

SQL Injection Check

Module

Login Page

Preconditions

User is on the login page

Test Steps

1. Enter ' OR '1'='1 in the username field.
2. Enter test data in the password field.
3. Click on the Login button.

Test Data

' OR '1'='1

Expected Result

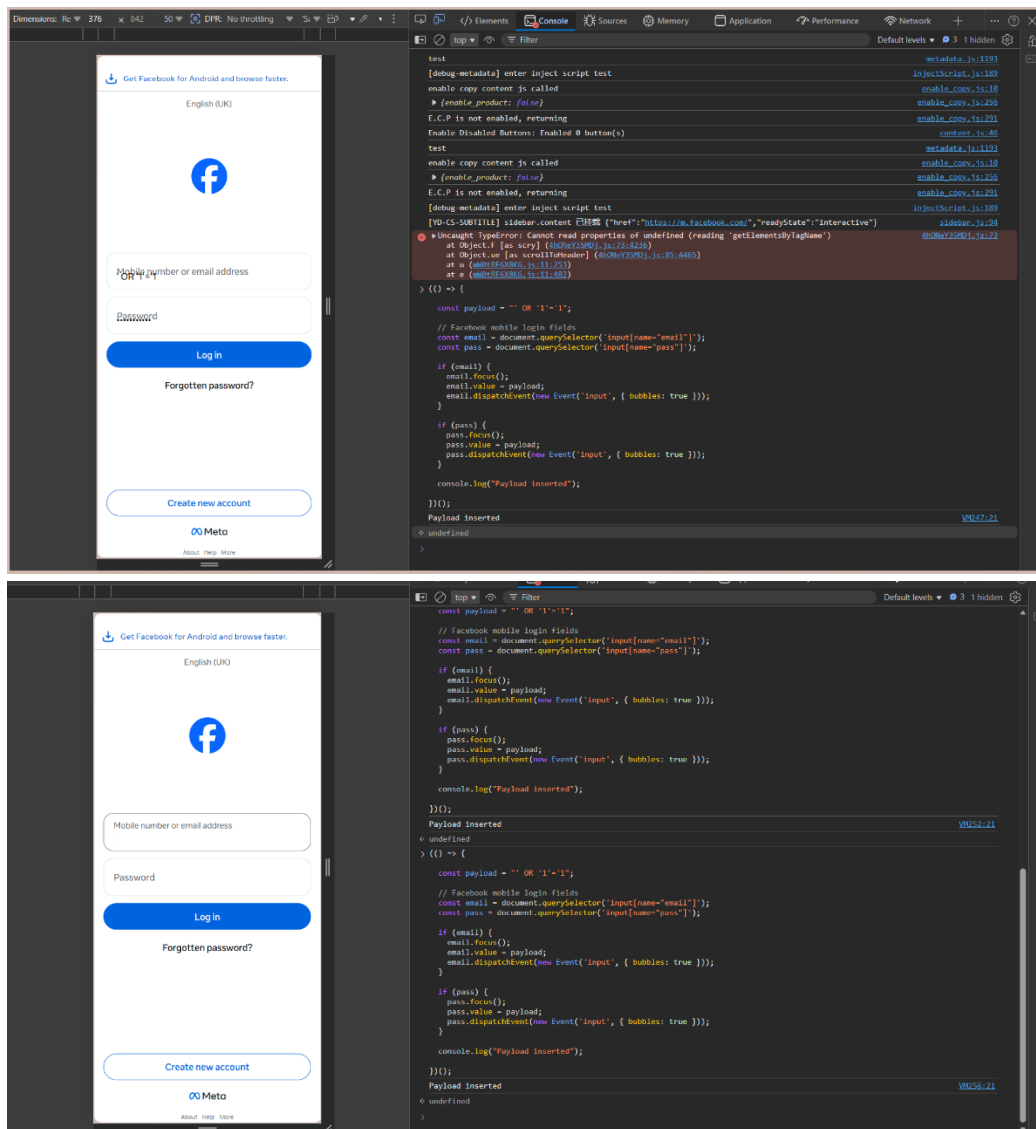

System should block the login attempt and display an error message without exposing database or SQL errors.

Actual Result

Application rejected the SQL injection payload and login was unsuccessful. No database error was displayed.

Status

Pass 

13.Test Case Name

Case Sensitivity Check

Module

Login Page

Preconditions

User is on the login page

Test Steps

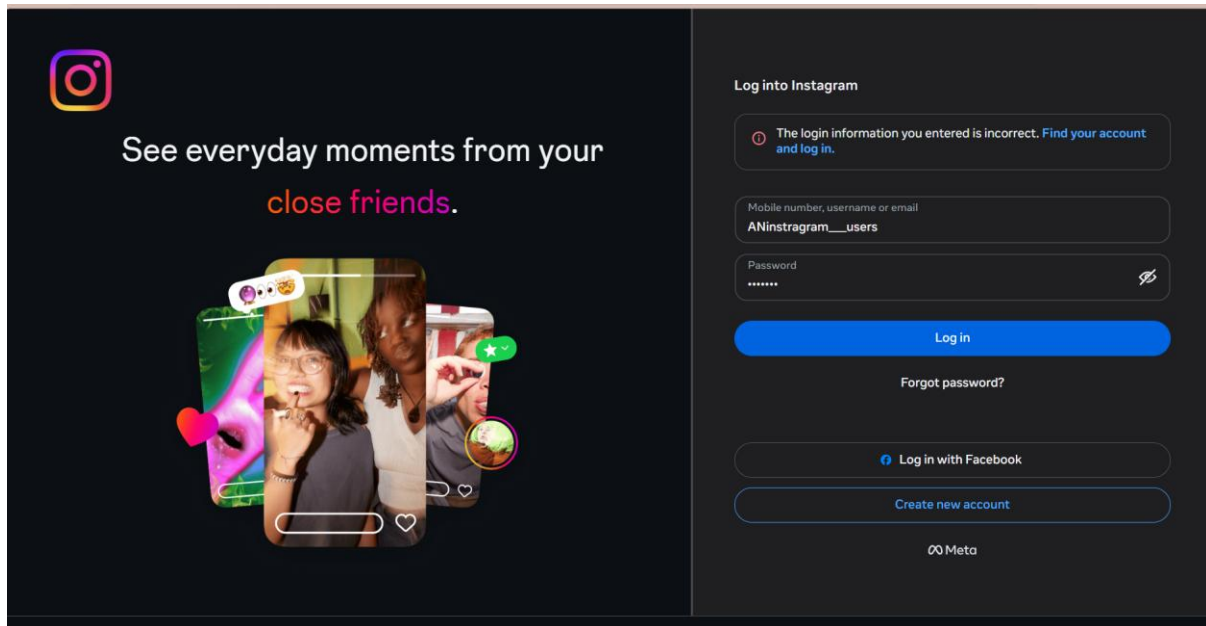

1. Enter username/password using different uppercase and lowercase combinations.
2. Click on the Login button.

Test Data

Username: ADMIN / admin

Password: Password123 / password123

Expected Result	System should validate credentials according to the defined case sensitivity rules.
Actual Result	Application correctly followed case sensitivity rules during login validation.
Status	Pass 

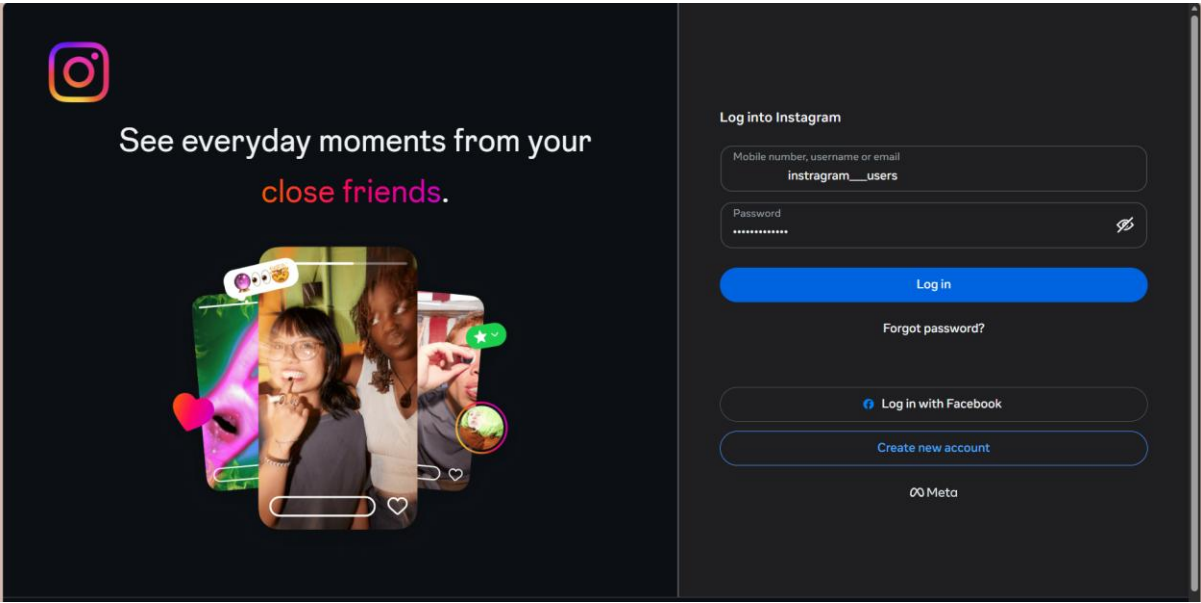

14.Test Case Name Leading/Trailing Spaces Validation

Module	Login Page
Preconditions	User is on the login page
Test Steps	1. Enter username with leading or trailing spaces. 2. Enter valid password. 3. Click on the Login button.
Test Data	instagram__users , instagram__users
Expected Result	System should trim extra spaces automatically or display a validation message.
Actual Result	Application handled leading/trailing spaces correctly and prevented invalid login behavior.

Status

Pass 

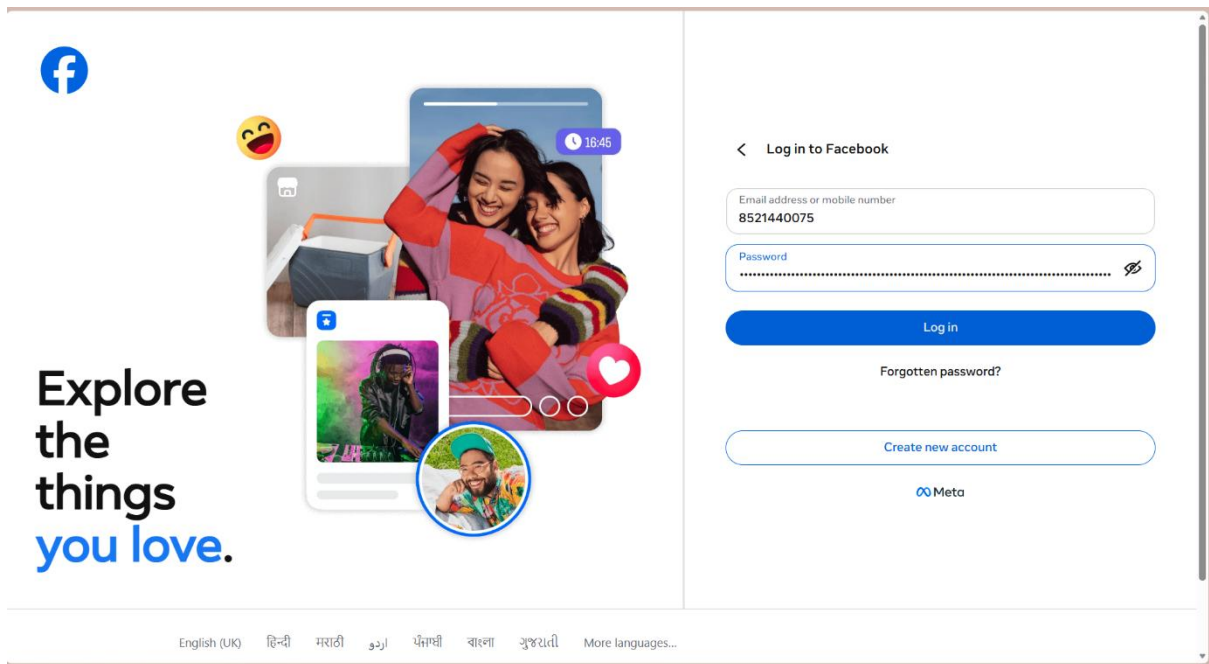

15.Test Case

Name

Maximum Character Limit Validation

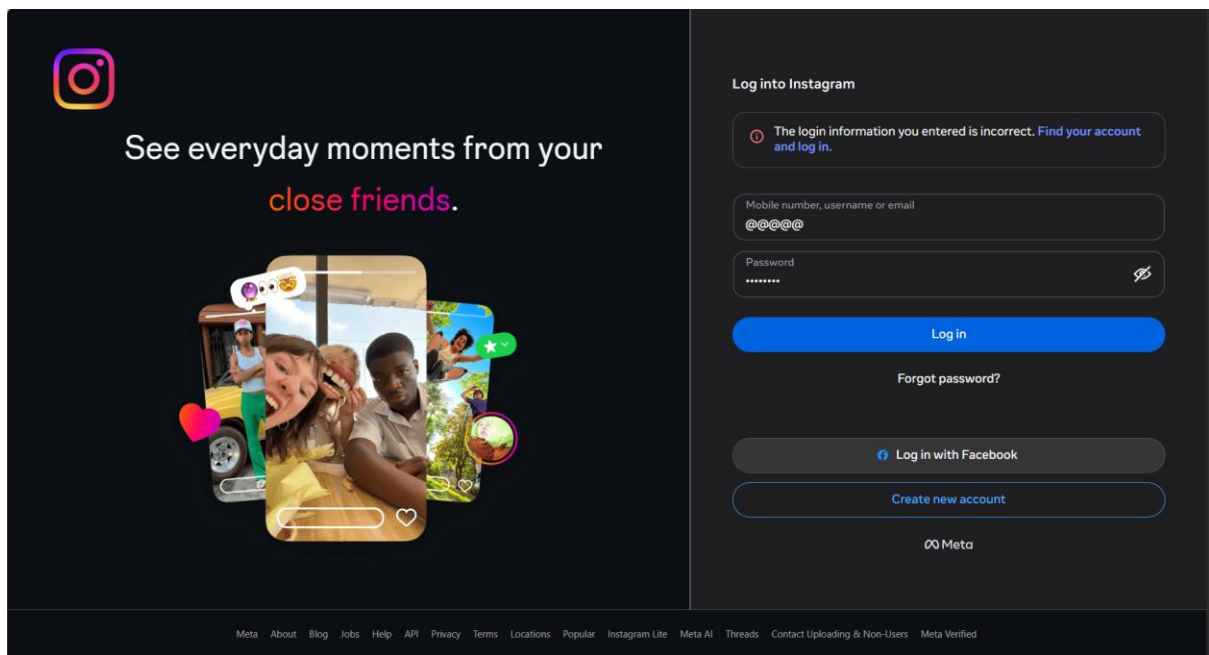

Module	Login Page
Preconditions	User is on the login page
Test Steps	1. Enter a very long username and password exceeding normal character limits. 2. Click on the Login button.
Test Data	Long username/password with excessive characters
Expected Result	System should restrict excessive input length or display a validation message.
Actual Result	Application allowed long password input without immediate restriction, but login validation was still handled securely.
Status	Pass 

16.Test Case Name

Special Characters Validation

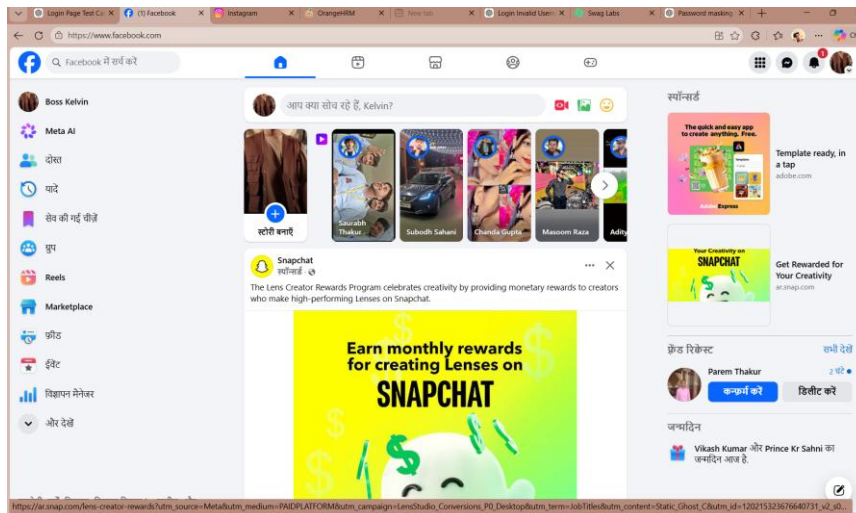

Module	Login Page
Preconditions	User is on the login page
Test Steps	1. Enter special characters in the username field. 2. Enter password. 3. Click on the Login button.
Test Data	@ @ @ @ @
Expected Result	System should validate the username field and reject invalid special characters.
Actual Result	Application rejected the invalid username and displayed an error message.
Status	Pass 

17.Test Case Name

Session Timeout Validation

Module	Login Page
Preconditions	User is logged into the application
Test Steps	1. Login with valid credentials. 2. Stay inactive for the defined timeout duration. 3. Observe system behavior.
Expected Result	User should be automatically logged out after session timeout.
Actual Result	Pending – waiting for timeout verification.
Status	In Progress 🕒

18.Test Case Name Multiple Failed Login Attempts

Module Login Page

Preconditions User is on the login page

Test Steps

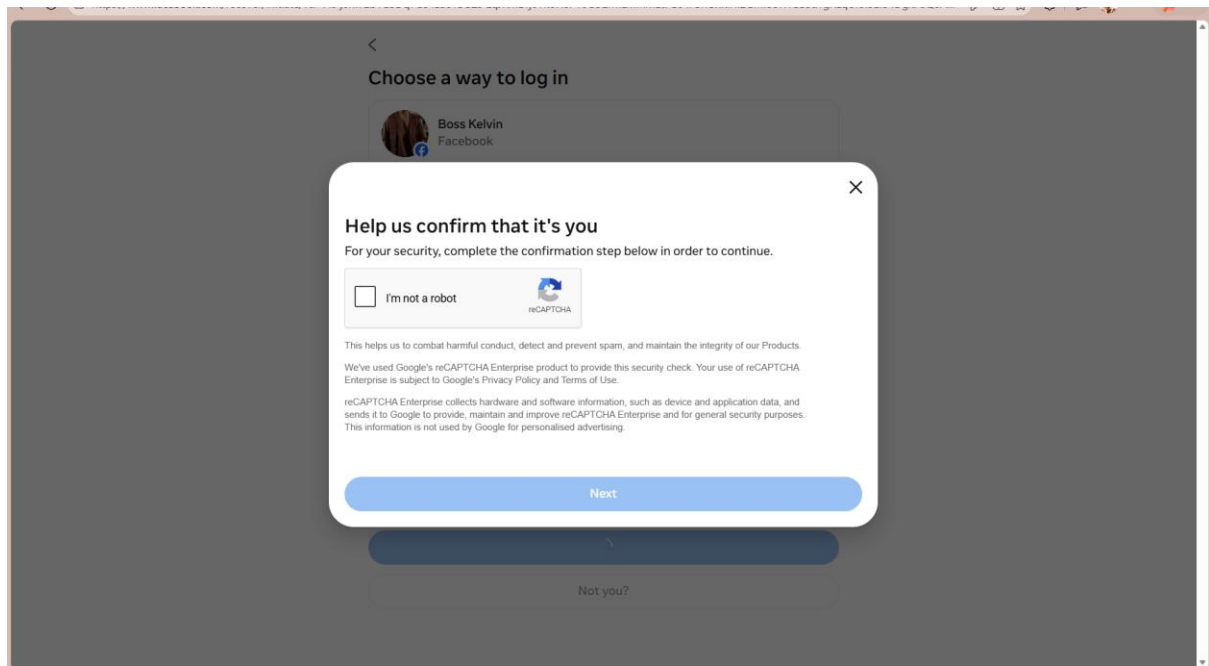

1. Enter valid username.
2. Enter incorrect password multiple times.
3. Observe the system response.

Expected Result System should prevent unauthorized access by rejecting invalid credentials and may display CAPTCHA, warning, or temporary restriction after repeated failed attempts.

Actual Result Application rejected invalid login attempts and displayed an error message. CAPTCHA was not triggered during testing.

Status

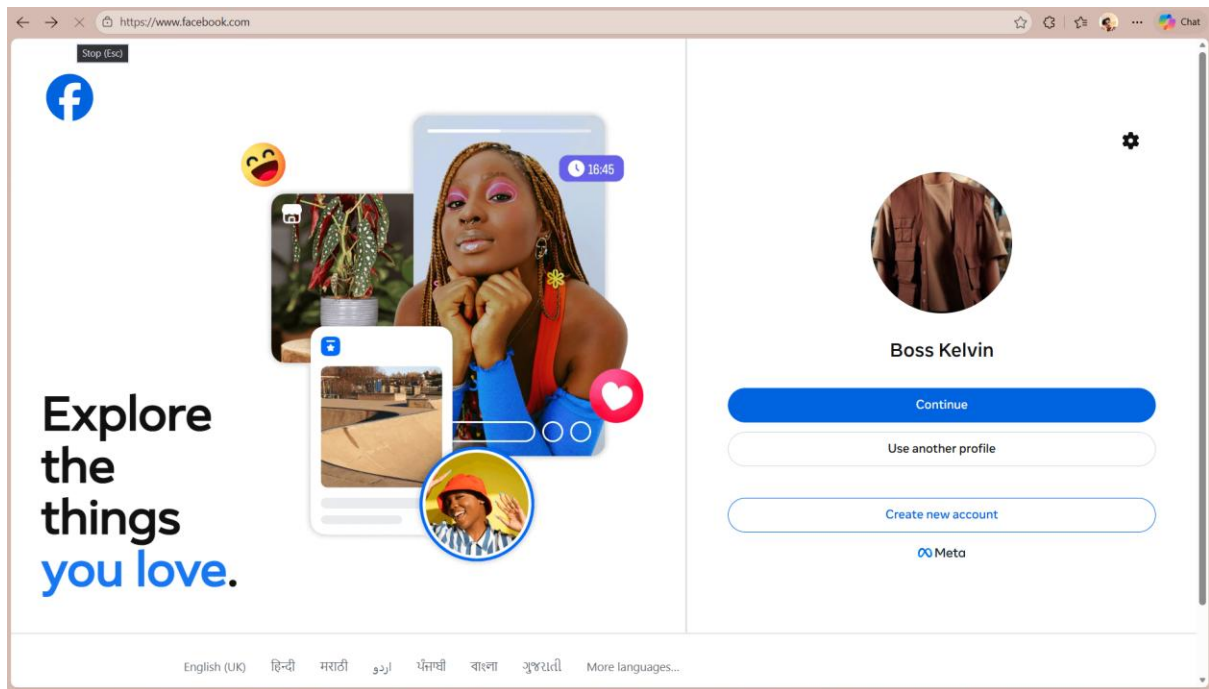

Pass 

19.Test Case Name

Browser Back Button After Logout

Module	Login Page
Preconditions	User is logged into the application
Test Steps	1. Login with valid credentials. 2. Logout from the application. 3. Press the browser back button.
Expected Result	User should not be able to access the dashboard after logout and should be redirected to the login page.
Actual Result	Application prevented access to the dashboard after logout and redirected the user appropriately.
Status	Pass 

Report

20.Test Case Name

Responsive Login Page Validation

Module

Login Page

Preconditions

User opens the login page on different screen sizes/devices

Test Steps

1. Open the login page.
2. Switch to mobile/tablet view using browser responsive mode.
3. Observe page layout and UI elements.

Expected Result

Login page should display properly and remain responsive across all devices and screen sizes.

Actual Result

Application displayed the login page correctly in mobile view without layout or alignment issues.

Status

Pass
